planning for higher education

Vol. 4, No. 6: December 1975

1975 Index

Planning for Higher Education is concerned with the academic, financial, and community aspects of planning, technical support systems, and the interrelationships between these elements. It is distributed every second month by the Society for College and University Planning to its memberships and to subscribers, and by Educational Facilities Laboratories to college and university planners, administrators, trustees, and others at national, state, and regional levels who are concerned with planning.

The 31 articles published in Volume 4 during 1975 are indexed by title, subject, and author. The numbering system assigns each article its own number and also indicates the total number of articles in each issue. To illustrate, "Vol. 4, No. 1:1/6" translates as "Volume Four, Number One: first of six articles." Reprints are available from the Society for College and University Planning, 3 Washington Square Village, Suite 1-A, New York, N.Y. 10012 at $1.00 per copy. Bulk rates are available upon request.
